It takes only 23 sec. to compile the same code in Linux using same version of Clang.

----- Eigen\_demo ( MAIN GCC DEBUG SHARED DEBUG\_FULL BLITZ POSIX LINUX ) ( 3 / 3)

BLITZ: eigen\_demo.cpp non-linear.cpp fft.cpp

Core: 68 file(s) built in (0:02.42), 35 msec / file

plugin/Eigen: 1 file(s) built in (0:03.34), 3346 msec / file

Eigen\_demo: 3 file(s) built in (0:22.95), 7651 msec / file

Linking...

/home/ssg/.local/soft/bb-worker/worker/l-upp/build/.cache/upp.out/CLANG.Debug.Debug\_Full.Shared/Eigen\_demo (78994008 B) linked in (0:02.03)

OK. (0:31.83)

\$ ./umk reference Eigen\_demo CLANG -busa

IMHO, something isn't right with the Clang bundled with Upp.

It, probably, has been compiled differently ...
