mirek wrote on Tue, 02 June 2020 11:40Can you post .bm?

I fixed problem with clang++ by using x86_64-w64-mingw32-clang++ instead of it. Before that I was trying to use /home/ssg/.local/soft/llvm-mingw/llvm-mingw-20200325-ubuntu-18.04/bin/clang++ as a compiler ... Plain clang++ didn't work by definition.

A new problem is that umk is passing POSIX and LINUX flags to x86_64-w64-mingw32-clang++ because it runs on Linux ... :)

Basically, this makes cross-compilation impossible with the current umk ...

BTW, Upp is currently broken ...

/home/ssg/.local/soft/bb-worker/worker/l-upp/build/uppsrc/Core/Ops.h:165:29: error: use of undeclared identifier 'HASH64_CONST3'

```
return (dword)SwapEndian64(HASH64_CONST3 * h);
```
