umk calls x86_64-w64-mingw32-windres.exe, which is called x86_64-w64-mingw32-windres (no extension) on Linux, otherwise +WIN32 seems to work ...

Could you please fix that?

You just need to replace

```
String windres = "windres.exe";
```

with

```
String windres = "windres";
```

TIA
