Novo wrote on Thu, 04 June 2020 21:14Another interesting observation. Size of executable.

mingw:
:~/.local/soft/bb-worker/worker/mingw-upp/build/.cache/upp.out/CLANG.Blitz.Gui.Win32$ ll AK.exe

-rwx------ 1 ssg ssg 2541056 Jun 4 14:56 AK.exe*

Not sure what is "mingw" here... Do you mean llvm-mingw toolchain in crosscompile mode?

If yes, could you activate Verbose mode and compare all compiler/linker options?
