Hello Maginor,
Quote:I would like to force a full rebuild of my working package, however I can only see a button to do a full rebuild of all packages in the project (taking a few minutes). Is there a button for this somewhere?

1) Right click on the package you want to rebuild (in theIDE's packages list, on the left).
2) Select "Clean Package" and/or "Build package" menu items.

Screenshot:

Hope this helps.

Best regards,
Oblivion
