Hello Pradip,

Looks great, happy to see it is usefull for you :p

To make a dynamic grid you have to :

..* modify GanttGridStepCalcCbK()

....This is the method that determines where to put grid lines

..* Modify PaintXxxx() methods to give each grid step the look you want

.....* PaintHGrid() : paints the grid on the graph

.....* PaintAxisTop() : paints the upper axis part (where the date is displayed)
