Subject: Re: How to toggle on/off word wrap in LineEdit/DocEdit?
Posted by mirek on Tue, 16 Jun 2020 15:49:05 GMT

I just checked in TheIDE and it works as expected.

Now checking in notepad I think you need DocEdit. That said, in my terminlogy that is not word-wrap (which I understand as breaking too long lines) but paragraph editor (where "LF" ends single paragraph instead of line).
