Mirek

No problem.

There is still a bug with

```
template <typename P, typename... T>
```

```
constexpr const P *get_i(int i, const P* p0, const T& ...args)
```

```
{  
    const char *list[] = { p0, args... };  
    return list[clamp(i, 0, (int)sizeof...(args))];  
}
```

It has to look like below.

```
template <typename P, typename... T>
```

```
constexpr const P *get_i(int i, const P* p0, const T& ...args)
```

```
{  
    const P *list[] = { p0, args... };  
    return list[clamp(i, 0, (int)sizeof...(args))];  
}
```
