Hi kuldo,

still not clear.

I get the following error :

cannot call member function 'virtual bool Upp::TopWindow::Key(Upp::dword, int)' without object

bool Tab5_Dynamic::Key(dword key, int val)

```
{  
LOG("key");  
DUMP("KeyAction");  
  
if(key == K_CTRL_S) {  
    bStart.Action();  
    return true;  
} else  
    return TopWindow::Key(key, val);  
}
```
