Current U++ Makefiles from svn/git repository work on Linux.

Please use U++ package for Windows (with CLANG) to get prebuild binaries.

[https://www.ultimatepp.org/www\\$upweb\\$download\\$en-us.html](https://www.ultimatepp.org/www$upweb$download$en-us.html)

With the included theide binary (U++ RAD tool), you will be able to compile U++ from source.
