TheIDE is crashing after swapping package :

- 1 - Open TheIDE, select "Button" example in "examples" assembly
 - 2 - When package is open, go to menu bar File > Open Main Package
 - 3 - Select another package (by example, Clock) and Open it
- Result : when loading the package, TheIDE crash

Tested in TheIDE build : 14673
(64 bit)(CLANG)(C++11)(C++14)
compiled 07/10/2020 01:11:28
Only tested on Windows 10

It was the nighty build at the time I download it
