It would however be handy if this patch could be made:
cppbuilder.cpp line 469

before:

```
if(package == mainpackage)
 info << Join(SvnInfo(package), "\r\n");
```

after patch

```
if(package == mainpackage)
 info << Join(SvnInfo(package), "\r\n") << "\r\n";
```

This is because I am including "build_info.h" in the .rc file and the microsoft resource compiler
throws an error if the last line of an included file does not end on a \r\n. Yeah, also their fault but
it's an ancient bug that will likely never be fixed.
It would avoid me having to recompile theide on a broken system.
