koldo wrote on Fri, 07 August 2020 00:20 Using TheIDE compiled with CLANG64 in W10, setting arguments in Run options/Program arguments, CommandLine() in Release splits the arguments between quotes. With the same arguments, running TheIDE in Debug mode works well, and running the application in a terminal in Release mode also works well.

Eh, can you post the exact commandline you are testing?

"running TheIDE in Debug mode works well" do you mean the application is Debug? Like that in release mode, it is bug, in debug, works fine?
