James Thomas wrote on Fri, 22 September 2006 09:45: Is such a thing possible? If not then some pointers on how/where they are implemented would be helpful so that I can reproduce the effect, I've looked through CtrlDraw.cpp but I'm none the wiser.

Thanks,  
JT

I am not sure what you mean by "speed" here, anyway ToolTip is implemented in CtrlLib/ToolTip.cpp (BTW, sometimes you can find where things are defined / implemented by pressing Ctrl+Q).
