Subject: Re: Custom build configuration per package
Posted by Klugier on Sun, 23 Aug 2020 21:46:29 GMT

Hello Xemuth,

All you need to do is add debug symbol to the release build. Example below:

You should be even configure it per package if you want to. All you need to do is stay with "None" debug info level for release mode and specify debug symbols for package your are interested in.

Sincerely,
Klugier
