Hello,

I have a GridCtrl in MultiSelect mode.  
The following code

```
int nsel = arr.GetSelectedCount();  
Exclamation(AsString(nsel));
```

give me the correct number of selected rows in case they are greater than one, but in case I choose only ONE row it give me 0.  
Is this the correct way to work?  
Test case attached.

Thanks,  
Luigi
