Subject: GridCtrl GetSelectedCount() bug?
Posted by forlano on Sat, 29 Aug 2020 10:23:22 GMT

Hello,

I have a GridCtrl in MultiSelect mode.
The following code

```
int nsel = arr.GetSelectedCount();
Exclamation(AsString(nsel));
```

give me the correct number of selected rows in case they are greater than one, but in case I choose only ONE row it give me 0.
Is this the correct way to work?
Test case attached.

Thanks,
Luigi
