Done voting.

But there is strange problem. Project link goes to page not found.

<https://www.codeproject.com/Articles/5268022/Getting-Started-with-Uplusplus-2020-1>

Also When I use codeproject search for U++ it shows links for 5~6 U++ projects. Clicking on all U++ links I am getting 404 response.

I think there was some temporary problem with Codeproject...
