I installed U++ on Mageia Linux 7.1. When I attempted to make a test 'hello world' package (Ctrl+F5) / (Debug > Execute) I received the following error:

```
. . .
ChWin32.cpp
clang-8: error: no such file or directory:
'/home/ernie/upp/.cache/upp.out/MyApps/CtrlLib/CLANG.Debug.D
ebug_Full.Gui.Shared/CtrlLib$blitz.cpp'
clang-8: error: no input files
error: unable to open output file
'/home/ernie/upp/.cache/upp.out/MyApps/CtrlLib/CLANG.Debug.D
ebug_Full.Gui.Shared/CtrlLibInit.o': 'No such file or directory
    '
1 error generated.
error: unable to open output file
'/home/ernie/upp/.cache/upp.out/MyApps/CtrlLib/CLANG.Debug.D
ebug_Full.Gui.Shared/ChWin32.o': 'No such file or directory'
1 error generated.
CtrlLib: 58 file(s) built in (0:00.77), 13 msecs / file

There were errors. (0:00.77)
```

theIDE runs O.K., but if I cannot build on Linux, the IDE is not much use to me. Any help will me very much appreciated.
