another related issue:

the editfield fld1 with "SetConvert" fld1.SetConvert(DateIntConvert())

is not receiving data according to the test code below:

```
void pkTestando:: onClick()
{
    Date d = Date ( 2020, 1, 1 );
    try
    {
        Value s = Format ( d );
        LOG ( "data " << s );
        fld1.SetData ( d );
    }
    catch ( ValueError )
    {
        LOG ( "Failed Value conversion" );
    }
}
```

but if he decides to remove condition "SetConvert" the field receives content normally.

What happens ?? or in the condition using "SetCovert" how do I have to write the code?
