ok, now i also solved the help chm load:

I changed the function to

```
void LaunchMy(const String& url, const String& p, const String& d, int howshow)
{
    WString wurl = ToSystemCharsetW(url);
    WString wp = ToSystemCharsetW(p);
    WString wd = ToSystemCharsetW(d);
    if ((int64)(ShellExecuteW(NULL, L"open", wurl, wp, wd, howshow)) <= 32) {
        int l = sizeof(wchar) * wurl.GetLength() + 1;
        char *curl = (char *)malloc(l);
        memcpy(curl, wurl, l);
        StartAuxThread(sShellExecuteOpen, curl);
    }
} //howshow: SW_HIDE (0) SW_SHOW (5) SW_SHOWDEFAULT (10)
```

to work:

```
LaunchMy("hh.EXE",
"ms-its:FinestFl.chm::/IDH_Topic20.htm",
//or "mk:@MSITStore:file.chm::/IDH_Topic20.htm"
"path of file.chm ie C:\\abc\\def\\ghi",SW_SHOW);
```

if you want you can close this topic. Thankful.
