mirek wrote on Mon, 12 October 2020 17:46 I have put the whole function on #ifdef, so hopefully tomorrow release will be fixed... You also need to do the same thing to the code below #if defined(PLATFORM\_POSIX) && defined(COMPILER\_GCC) && !defined(PLATFORM\_ANDROID) # include <execinfo.h> # include <cxxabi.h> #endif

execinfo.h is not available by default in Alpine Linux.
