Hello,

In the GUI tutorials we had something like this:

```
#define IMAGECLASS TutorialImg  
#define IMAGEFILE <Tutorial/images.iml>  
#include <Draw/iml.h>
```

The issue was solved on trunk. And looks like this (for different tutorials number was changed):

```
#define IMAGECLASS TutorialImg  
#define IMAGEFILE <Gui11/images.iml>  
#include <Draw/iml.h>
```

Klugier
