Now it compile, but explotes in function

```
MBPixbuflImage *  
mb_pixbuf_img_scale(MBPixbuf *pb, MBPixbuflImage *img,  
    int new_width, int new_height)  
{
```

in file mbpixbuf.c

img value is 0x0

The error is because the global variable 'ApplImage' is Null.
The problem is in function mb_pixbuf_img_new_from_file because the image need to be a .xpm
file!!! (see line number 1341 to 1371 of mbpixbuf.c)

Nico
