jimlef wrote on Sun, 25 October 2020 22:04: Has anyone else noticed this? I've seen it in multiple versions from 2020.1 up to and including 15279 (running on Linux). It just happened again...

I have a layout with the line:

```
ITEM(Option, optProdTaxable, SetLabel(t_("Taxable?")).WantFocus(true).LeftPosZ(708,  
60).TopPosZ(120, 16))
```

^^^^^^^^^^^^^^^^

everything compiles fine... However, after I change anything else in the layout (say adding a new one), then compile, it reverts that line to:

```
ITEM(Option, optProdTaxable, WantFocus(true).SetLabel(t_("Taxable?")).LeftPosZ(708,  
60).TopPosZ(120, 16))
```

^^^^^^^^^^^^^^^^

which fails to compile with an /home/james/upp/MyApps/Invoices/Invoices.lay (49): error: no member named 'SetLabel' in 'Upp::Ctrl'

I switch it back to the first version, and all is well - until I make another change (forcing the saving of the layout file again).

Anyone else?

Jim

Now looking at it, I believe that you must have edited .lay file in text editor to add WantFocus there. Is that correct?
