jimlef wrote on Tue, 27 October 2020 16:15I understand... it's a minor thing as as you say I can do  
a `optProdTaxable.WantFocus(true)` in code...  
but better to keep theide and library all at the same level I think.  
Thanks again :)

Actually, it is not hardwired in theide; special files with .usc extension control this. Check  
`CtrlLib/CtrlLib.usc` ... So it is to keep library and library at the same level :)
