I know that the spirit is collaborative, I understand, that not everyone has the same difficulties.
After 20 years, I abandoned Delphi, started in January for Java (I already migrated 2 applications)
but I need to work with a native language and chose C ++ 2 months ago. I liked u ++ and I know it
is complex at first, and I depend a lot on the spirit of solidarity and understanding of you who are
on the other side of the ocean. I thank your guardian angels!

who is the expert who created the report module for U++ ?
