Hello everyone

Cannot upload the others as they are all using 2 packs of my lib, but tried the following with std only:

```
// main.cpp
#include <iostream> // cin, cout
#include <conio.h> // getch(), _kbhit()
#include <stdlib.h> // rand()
using namespace std;

int printNumbers()
{
    int num = rand() % 16;
    cout << (int)num << ", ";
    return num;
}

int main()
{
    for (int i=16; i; i--)
        printNumbers();

    cout << "press any key to quit program.";
    return getch();
}
```

And suprise: did the same again.

Will search for another compiler :].

Thanx to all for your effort.

Martin
