When working on a new Ultimate++ package template I noticed a mistake in the "Ultimate++ Project templates" documentation, section 7 "Deployment". The last paragraph must read: "Subdirectories are also scanned." (Shame on me - I myself wrote the documentation. )

The mistake has been corrected in the attached file. On this occasion I updated the first paragraph in section 8 "Epilogue".

May I suggest, Mirek, to replace "PackageTemplates\$en-us.tpp" with the attached file?

Werner
