Hi,

what means "for(;;)" ?

```
        dlg.number <= 10;
for(;;)
switch(dlg.Execute()) {
case IDOK:
    PromptOK(AsString(~dlg.number));
    break;
case IDCANCEL:
    return;
}
```

```
        double x = Mul(p);
for(;;)
    if(p.Char('+'))
        x = x + Mul(p);
    else
        if(p.Char('-'))
            x = x - Mul(p);
    else
        return x;
```

is something defined in U++ or C++?

thanks
