Hi,

As the title explains, the Ctrl+semicolon and Ctrl+Period keys share the same constant value and this results in error in Win32 if they are both used in the same switch statement.

See, Win32Keys.h, In: 118, 119:

```
K_CTRL_PERIOD   = K_CTRL|0xbe|K_DELTA,  
K_CTRL_SEMICOLON = K_CTRL|0xbe|K_DELTA,
```

Best regards,  
Oblivion
