Subject: Re: ide: Copy position, Goto clipboard position
Posted by Xemuth on Fri, 11 Dec 2020 13:12:04 GMT

Hello, I just posted a mesage using this feature on forum, it's very convenient !
However, when jumping to a file which is not part of a package (let's say
c:\upp\upp\bin\clang\include\sal.h) and try to copy position, the copy position don't work (my
clipboard remain the same as before the copy position).
It would be good to copy filename and position when TheIDE don't know from what package this
file come from
