coolman wrote on Tue, 15 December 2020 15:18 Yes, it is 64bit system. That's why it's weird.

Linux ul001998 5.4.0-58-generic #64-Ubuntu SMP Wed Dec 9 08:16:25 UTC 2020 x86\_64  
x86\_64 x86\_64 GNU/Linux

So it looks like I have wrong settings for gcc build method. Is there a possibility to reset the build method setting to "default" for particular compiler?

Radek

Delete or rename the configuration folder for theide. I guess it is better to rename, so that you can the copy just the .bm file.
