Subject: how to convert view point to logic point
Posted by zouql on Sun, 20 Dec 2020 07:45:46 GMT

Hi all:
    when using Painter's scale/translate/rotate, it convert the user's
point to view point. So when mouse event LeftDown(Point p,dword flags),
the Point p is view point, Is there any way to convert this viewpoint
to user point for user's comparison and judgment logic?
