Hello Mirek,
I think the package licenses (BSD/MIT/GPL, etc.) should also be displayed on the packages list. It is an important info.

Also, I am eager to move at least some components to UppHub, if not the whole upp-components repo.

I am currently assessing a viable strategy to do that. (I need to keep upp-components repo intact, possibly synced with upphub packages, as I can't assume that all users use TheIDE or Upp >= 2021.1)

Best regards,
Oblivion.
