
Subject: GuiLock and GuiUnlock objects are of different type.

Hi,

GuiLock is defined as a struct, and GuiUnlock as a class. I think the source code should be consistent.

My recommendation:

```
class GuiLock { // <--- changed struct to class
public:      // <--- added.
    GuiLock() { EnterGuiMutex(); }
    ~GuiLock() { LeaveGuiMutex(); }
};
```

```
class GuiUnlock {
    int n;

public:
    GuiUnlock() { n = LeaveGuiMutexAll(); }
    ~GuiUnlock() { EnterGuiMutex(n); }
};
```

Best regards,
Oblivion
