Quote:

SysInfo is maintained and tested daily. Please tell me in what environment you have that error and I will solve it.

I've just opened "bazaar/SysInfo\_demo\_gui", then compiled it (Execute button) on the freshly installed Upp TheIDE Version 15260 (CLANGx64 Debug).

My System:

Edition Windows 10 Pro

Version 20H2

Build 19042.746

Feature Experience Pack 120.2212.551.0

It throws me over 20 errors, one of it is the one with "mt19937".

Best Regards, Daniel

Hello dschoni

This is really weird. My base system is similar to yours.

Does anybody could compile Bazaar/SysInfo under CLANG in Windows 10 to try to reproduce this error?

Thank you!
