Yes, I managed to build something with visual studio using the new feature to generate library.

 https://www.ultimatepp.org/forums/index.php?t=msg&th=112 72&start=0&

The effort stalled sort of. I guess the problem is that long term users are happy with TheIDE and do not need VS Studio (or Code), while non-users who could help there are not interested in U++ because it does not work in VS Code.... :)

Anyway, technically, it is already possible.
