I just noticed that Mirek to speed up the development of UppHub move some or your crucial packages into ultimatepp organization. Sometimes ago, we agree that only core packages should be placed there. So, in the long term it should be move under personal umbrella. Could you move these packages in your spare time and create PR with updated link to UppHub repository.

Klugier

Hi Klugier.

You should address this to Mirek, not to me.

Well, it is not that easy: I cannot create repository under you personal account in github.

But you CAN move the modules I have created to your personal account (there is web interface in github to do so) if we/you decide it is desirable.

Mirek
