Hi,  
I download v15764, windows 10, 64bits  
  
and doesn't work as expected ie

```
gridCta.Searching();  
gridCta.SetToolBar(BarCtrl::BAR_BOTTOM);  
gridCta.MultiSelect(false);
```

after starting with the line above,  
in the grid I click with the right button and it displays  
menu to select all. Having chosen not to do multiple selection,  
what is the reason for selecting all?

if I go to the source and inhibit the menu call,  
works as intended.

Or have solution without changing the source?

GridCtrl.cpp

```
if(multi_select || !select_row)  
{  
    SelectMenu(bar); // if inhibiting this line its works as expected  
    isitem = true;  
}
```

Thanks
