Quote:MyApps is a folder. Check what subfolders really are in that folder (using OS file manager).

Mirek

Thank you very much Mirek. Ok I understand now. I have copied the content of the uppHub in MyApps folder and Control4U package is now available :p See below.

The only problem :? which remains concerns SysExec which is not available from uppHub downloads. See the picture herehunder.

Waiting for your advice and many thanks in advance

Have a good day
