Hi Mirek,

Thanks for getting this going! Unfortunately, my hardware returns false for IsPointerPen(). Based on RDUMPs I tried, it never even visits this code in Ctrl::WindowProc() :
 case WM_POINTERDOWN:
 case WM_POINTERUPDATE:
 case WM_POINTERUP:

  ...

I will try to dig in further to figure out what's going on...

As for Windows 7, I have none left... I hope someone around here still does.

Best regards,

Tom
