Tom1 wrote on Tue, 09 March 2021 13:10Hi Mirek,

Thanks for getting this going! Unfortunately, my hardware returns false for IsPointerPen(). Based on RDUMPs I tried, it never even visits this code in Ctrl::WindowProc() :

```
case WM_POINTERDOWN:  
case WM_POINTERUPDATE:  
case WM_POINTERUP:  
...
```

I will try to dig in further to figure out what's going on...

As for Windows 7, I have none left... I hope someone around here still does.

Best regards,

Tom

Do you have proper drivers installed? I have found it is not quite easy to get the pen working...

Mirek
