Here, Athlon XP 2000+ (1.6GZ), 256MB RAM, 7200RPM HD:

Quote:----- Days ( GUI MAIN GCC DEBUG DEBUG\_FULL BLITZ WIN32 ) (9 / 9)

main.cpp

Days: 1 file(s) built in (0:10.89), 10891 msecs / file, duration = 10907 msecs

Linking...

C:\upp\out\MINGW.Debug\_full.Gui\Days.exe (12590698 B) linked in (0:31.26)

OK. (0:42.45)

I think the speed is right.

I like U++ a lot, but Mingw speed is quite boring. I think I'll install MSVC++ 2003 Toolkit(not 2005 Express - I don't need the IDE)+Platform SDK, even if it will waste some HD space, but it'll be faster to compile/test/learn with U++ and build some applications.

Thanks for attention!
