LeiMing wrote on Sat, 27 March 2021 07:49I'm trying with 2020.2 (svn 15260).  
There is no download link for macos on nightly build page.  
You could try to build it from the source code:  
git clone <https://github.com/ultimatepp/ultimatepp.git>  
cd ultimatepp  
make -f umkMakefile  
./umk ./uppsrc ide CLANG -busr
