LeiMing wrote on Sat, 27 March 2021 07:49I'm trying with 2020.2 (svn 15260).
There is no download link for macos on nightly build page.
You could try to build it from the source code:
git clone <https://github.com/ultimatepp/ultimatepp.git>
cd ultimatepp
make -f umkMakefile
./umk ./uppsrc ide CLANG -busr
