Well, I am afraid the problem is not fudforum itself, but provider stopping backup script execution - dump file has always different size.. (+/- 15MB).

I guess that means you're using the datadump script described here.
 http://fudforum.org/forum/index.php?t=msg&goto=28470&amp
;&srch=backup+script#msg_28470
I thought fudforum people might have a suggestion.
