Hello Didier,

While working for printing the gantt chart, found that these functions need const access to scale.

void GanttXGridAxisDraw::GanttGridStepCalcCbk(GridStepManager& gridStepManager, CoordinateConverter& coordConv){

void GanttXGridAxisDraw::PaintHGrid(Draw& dw, int yRange, const_GridStepIterator iter, const_GridStepIterator endIter) {

void GanttYGridAxisDraw::PaintVGrid(Draw& dw, int xRange, const_GridStepIterator iter, const_GridStepIterator endIter) {

GanttXGridAxisDraw::GanttGridStepCalcCbk needs scale to show the dynamic grid on both screen and print correctly, Please see the attached PDF which will illustrate this clearly.

Paint*Grid needs scale to draw the grids with right thickness on both screen and print.

Please advise.
