Subject: How to make this looking EditString UI Posted by james_888 on Wed, 14 Apr 2021 16:32:21 GMT

I want to make this UI with Ultimate++.

I have looked into the tutorials and references, but I couldn't

The problem is, it's very difficult to make the rounded edge of EditString with flat design.

And I tried making with ChFlatDarkSkin of Chameleon, but it didn't help me.

Please help me if anyone knows how to do it.

Thank you.
