Subject: Re: GLCtrl Linux dependency
Posted by Tom1 on Thu, 15 Apr 2021 07:54:09 GMT

Hi Mirek,

Thanks for your words. It's fine with me it's not included by default. Just wanted to point it out just in case this was not the intended policy.

For those looking for missing dependencies on Ubuntu family of Linux systems may benefit from using dpkg command as follows to find the missing packages. Here's an example for finding a package containing GL/glu.h:
$ dpkg -S GL/glu.h
libglu1-mesa-dev:amd64: /usr/include/GL/glu.h

Best regards,

Tom
